WORKSHOP Organized by IQAC, LALBABA COLLEGE

11th March, 2022

The Internal Quality Assurance Cell (IQAC) of Lalbaba College organized a Workshop-cum-Induction Programme for teachers of Lalbaba College on "" at Lalbaba College on 11th March, 2022. The Principal of Lalbaba College, Dr. Sanjay Kumar and Dr. Chhatradhar Das, IQAC Coordinator were the chief patrons of this initiative.

The theme of the workshop was "BLOOM'S TAXONOMY IN DESIGN AND ASSESSMENT OF COURSE OUTCOMES". The resource persons for the technical sessions were Prof. Suprio Biswas (Dept. of Education, Lalbaba College) and Prof. Biswajit Goswami (Dept. of Education, Lalbaba College).

Prof. Biswajit Goswami began sharing screen in first half of the workshop. The audience learnt the history of Blooms Taxonomy which was adopted after 2010. Before that Harvard style was followed in India. In 2015 Bloom's Taxonomy was revised. He opined that it gave shape to pedagogy adopted in teaching whose aim is to give stimulus to the cognitive process of learning. In the second half, Prof. Suprio Biswas focused on the technical aspects of Bloom's Taxonomy where the audience got to learn how to write the Programme Learning Outcome and Course Learning Outcome. The second part drew to a close with the suggestion to edit the said "outcomes" by using words which are not vague and are easily intelligible. After the completion of the second part, Prof. Nidhi Chowdhary opened the floor for questioning where most of the questions were concerned with "whys" rather than "whats", as to how Bloom's Taxonomy may be applied in teaching. The workshop ended with distributing certificates among the teachers. Altogether 38 participants joined in this workshop.

Theme and Objective

Course outcomes are prepared keeping in mind the benefit that a learner would derive after completion of each course. Given the diversity of learner's capacity and interest, the measurement of such outcome for each learner based on their performance and participation becomes crucial for a teacher, in order to meet the changing requirements. Bloom's Taxonomy is commonly used by most learning designers for developing their course learning outcomes. It also used to assess the learning on a variety of cognitive, affective and psychomotor domains.

Bloom's taxonomy can be incorporated for providing a common language for teachers to discuss and exchange learning and assessment methods. To address the method of measuring the level of attainment of course outcomes by the institution the taxonomy is best represented that focused on student achievement. The goal of an educator's using Bloom's taxonomy is to encourage higher-order thought in their students by building up from lower-level cognitive skills.

At the end of the workshop, it is expected that Course Outcomes of each subject is revised as per Bloom's Taxonomy so that the attainment of such outcomes is measured.
